The Mathematics and Science Partnerships Grant Program is authorized through provisions of Title II, Part B of the No Child Left Behind Act of 2001. The purpose of this funding is to increase the academic achievement of students in mathematics and science by enhancing the content knowledge and teaching skills of classroom teachers. Partnerships between high-need Local Educational Agencies (LEAs) and the science, technology, engineering, and mathematics (STEM) faculty in institutions of higher education are at the core of these improvement efforts. Other partners may include public schools, private schools, business, and non-profit or for-profit organizations involved in mathematics and science education.
